Profile

I have 7+ years of Python back-end experience, coupled with a strong drive for continuous learning. My journey includes diverse technologies, projects, team leadership, and turning ideas into reality.

Experience

Backend Engineer, Roskomsvoboda, Moscow

APRIL 2018 — PRESENT

Responsibilities:

- Analyze requirements, collaborate on solutions, design functionality, execute tasks, and produce comprehensive tests and documentation.
- Identify and optimize challenging code sections, driving performance improvements through thoughtful refactoring.
- Mentor junior developers, conduct code reviews, and facilitate the effective onboarding of new team members.

Achievements:

- Designed and developed tools that uphold free speech by creating solutions to counter censorship.
- Took charge of the migration initiative, overseeing the smooth transition of projects from Python 2 to Python 3, ensuring modernization and compatibility throughout.
- Significantly improved system efficiency by fine-tuning database queries, resulting in a twofold increase in performance and responsiveness.

Full-Stack Developer , Digrate, Moscow
